Technology Stacks

- Python
- Django
- PostgreSQL
- JavaScript
- React JS
- Node JS
- OOPs
- MySQL
- Express
- MongoDB
- Data Structures
- Bootstrap

Experience

Yogya Capital

December 2023 - March 2024

Associate Software Engineer, Surat

India

- Successfully completed assigned tasks, including integrating NSE chat functionality into projects..
- Presently focused on developing a dynamic dashboard for enhanced project functionality, improved efficiency.
- Demonstrated proactive problem-solving skills and commitment to excellence in web development.

TechReale

July 2023 - December 2023

Junior Web Developer, Intern, Valsad

India

- Interned at TechReale, gaining comprehensive knowledge from basic to advanced JavaScript, ExpressJS, NodeJS, JWT, MongoDB, and ReactJS.
- Acquired hands-on experience and implemented various concepts learned during the internship.
- Successfully completed the internship by developing a final project, "Library Management System," demonstrating proficiency in utilizing the acquired skills.
- Demonstrated ability to apply theoretical knowledge practically and contribute effectively to project development.

My Projects

March 2023 - June 2023

Self Managed Project

India

- Engaged with Ambica Fashion, acquiring diverse skills including product card design, Bootstrap, PHP, MySQL, and advanced JavaScript.
- Demonstrated proficiency in essential functionalities such as adding, deleting, and updating products, alongside crafting dynamic admin dashboards.
- Enhanced understanding through hands-on experience, contributing to the development and maintenance of Ambica Fashion's digital infrastructure.

Projects

Ambica Fashion: Built front-end web application to show and manage products with technologies like HTML, CSS, and potentially JavaScript (exploring back end integration with PHP).

Portfolio: Built front-end web application with technologies like React JS, CSS, and JavaScript (Included features are WhatsApp messaging, Email sending, Notifications, UI design, etc)

Library Management System: Built a Library Management System using technologies like ReactJS, JavaScript, and Bootstrap. Included features are book management, user registration, search functionality, borrowing and returning management, notifications, and an intuitive UI design.

On-Going Projects

Ambica Fashion: Developing a new website for Ambica Fashion using modern technologies like Python, Django, and ReactJS for dynamic and responsive features. The design incorporates either Bootstrap or Tailwind CSS for a sleek, user-friendly interface. PostgreSQL is used as the database for efficient data management and scalability.

Certifications

Oracle: Oracle Cloud Infrastructure 2023 AI Certified Foundations Associate

Leadership / Extracurricular

- Member of the Parvaah Website Team, the tech-management fest of the college for the year 2022.
- Volunteer of an orientation Program.
- Participated in various collage tech-fest program.
